JOURNAL OF CELLULAR AND COMPARATIVE PHYSIOLOGY

Board of Editors

ARTHUR K. PARPART, Managing Editor
Princeton University

W. R. AMBERSON
University of Maryland

H. F. BLUM
National Cancer Institute

D. W. BRONK
The Rockefeller Institute

L. B. FLEXNER
University of Pennsylvania

M. H. JACOBS
University of Pennsylvania

D. MARSLAND
New York University

D. MAZIA
University of California

VOLUME 54

AUGUST, OCTOBER, DECEMBER

AND

SUPPLEMENT 1 DECEMBER

CONTENTS

No. 1 AUGUST 1959

EDMUND NEWTON HARVEY—1887–1959 (with portrait) 3

J. W. GREEN, H. F. BLUM AND A. K. PARPART. Prehemolytic studies of photosensitized rabbit erythrocytes 5

J. ROBERT TROYER. Histochemical and biochemical studies of liver glycogen in a hibernator, *Myotis lucifugus lucifugus* 11

FREDDIE SHERMAN. The effects of elevated temperatures on yeast. I. Nutrient requirements for growth at elevated temperatures 29

FREDDIE SHERMAN. The effects of elevated temperatures on yeast. II. Induction of respiratory-deficient mutants 37

CHARLES P. LYMAN AND DORIS C. BLINKS. The effect of temperature on the isolated hearts of closely related hibernators and non-hibernators 53

A. VAN HARREVELD AND J. P. SCHADÉ. Chloride movements in cerebral cortex after circulatory arrest and during spreading depression 65

A. VAN HARREVELD AND M. MENDELSON. Glutamate-induced contractions in crustacean muscle 85

C. J. BROKAW. Random and oriented movements of bracken spermatozoids 95

ALEXANDER LEAF. The mechanism of the asymmetrical distribution of endogenous lactate about the isolated toad bladder 103

LAWRENCE E. SCHEVING, JOHN J. CHIAKULAS AND HILLYARD I. ABZUG. A basic rhythmicity in the mitotic rate of urodele epidermis and the difference in mitotic rate between larvae reared in the laboratory and in a pond 109

AURIN M. CHASE, FRED S. HURST AND HOWARD J. ZEFT. The effect of temperature on the non-luminescent oxidation of *Cypridina* luciferin 115

Comments and Communications:

JACK D. BURKE. The effects of different salt concentrations on the affinity of hemoglobin for oxygen 126

No. 2 OCTOBER 1959

C. LADD PROSSER AND NICK SPERELAKIS. Electrical evidence for dual innervation of muscle fibers in the Sipunculid *Golfingia* (= Phascolosoma) 129

C. LADD PROSSER, C. L. RALPH AND WM. W. STEINBERGER. Responses to stretch and the effect of pull on propagation in non-striated muscles of *Golfingia* (= Phascolosoma) and Mustelus 135

WILFORD L. HASLETT AND DONALD J. JENDEN. The influence of temperature on the kinetics of ryanodine contracture 147

SUMNER M. KALMAN. Sodium and water exchange in the trout egg 155

JACK R. HOFFERT AND P. O. FROMM. Estimation of thyroid secretion rate of rainbow trout using radioactive iodine 163

HIDEKI TATEDA AND HIROMICHI MORITA. Initiation of spike potentials in contact chemosensory hairs of insects. I. The generation site of the recorded spike potentials 171

HIROMICHI MORITA AND KIMIHISA TAKEDA. Initiation of spike potentials in contact chemosensory hairs of insects. II. The effect of electric current on tarsal chemosensory hairs of *Vanessa* 177

HIROMICHI MORITA. Initiation of spike potentials in contact chemosensory hairs of insects. III. D.C. stimulation and generator potential of labellar chemoreceptor of *Calliphora* 189

SOCIETY OF GENERAL PHYSIOLOGISTS. Fourteenth Annual Meeting, University of Illinois, Urbana, Illinois, September 7, 8, and 9, 1959 205

No. 3 DECEMBER 1959

AKIRA TAKEUCHI. Neuromuscular transmission of fish skeletal muscles investigated with intracellular microelectrode 211

Bede Morris. The proteins and lipids of the plasma of some species of Australian fresh and salt water fish 221

Fumitake Inoue. Slow potential and conduction delay at the atrio-ventricular region in frog's heart 231

Suk Ki Hong and Roy P. Forster. Further observations on the separate steps involved in the active transport of chlorphenol red by isolated renal tubules of the flounder *in vitro* 237

H. J. Wolfe and K. C. Huang. The conjugation of the aminobenzoic acid isomers in the adult and embryonic *Gallus domesticus* 243

Syoji Higashino. The action of ultrasound on the neuromuscular junctions 251

Madhu S. Kanungo and C. Ladd Prosser. Physiological and biochemical adaptation of goldfish to cold and warm temperatures. I. Standard and active oxygen consumptions of cold- and warm-acclimated goldfish at various temperatures 259

Madhu S. Kanungo and C. Ladd Prosser. Physiological and biochemical adaptation of goldfish to cold and warm temperatures. II. Oxygen consumption of liver homogenate; oxygen consumption and oxidative phosphorylation of liver mitochondria 265

Allan H. Roush, Lillian M. Questiaux and A. J. Domnas. The active transport and metabolism of purines in the yeast, *Candida utilis* 275

Martin Roeder. The response of *Arbacia plutei* to added amino acids 287

Comments and Communications:

J. C. George and J. Eapen. Lipase activity in the fat body of the desert locust, *Schistocerca gregaria* 293

R. G. Faust and M. F. Filosa. Permeability studies on the amoebae of the slime mold, *Dictyostelium mucoroides* .. 297

SUPPLEMENT 1 DECEMBER 1959

Alexander Hollaender — Introduction vii

Alexander R. Todd. Introduction to the Symposium on Enzyme Reaction Mechanisms 1

CONTENTS

H. Gobind Khorana. Synthesis and structural analysis of polynucleotides. Seven figures 5

Mildred Cohn. Mechanisms of enzymic cleavage of some organic phosphates. Five figures 17

Feodor Lynen. Participation of acyl—CoA in carbon chain biosynthesis. Twenty-five figures 33

Melvin Calvin and Ning G. Pon. Carboxylations and decarboxylations. Thirty figures 51

Fritz Lipmann, W. C. Hülsmann, G. Hartmann, Hans G. Boman, and George Acs. Amino acid activation and protein synthesis. Seven figures 75

Bernard L. Horecker. Aldol and ketol condensations. Twenty-two figures 89

F. M. Huennekens, H. R. Whiteley, and M. J. Osborn. Mechanisms of formylation and hydroxymethylation reactions. Eighteen figures 109

Shlomo Hestrin. Substrate specificity of chain propagation steps in saccharide synthesis. Two figures 127

John M. Buchanan, Standish C. Hartman, Robert L. Herrmann, and Richard A. Day. Reactions involving the carbon—nitrogen bond: heterocyclic compounds. Sixteen figures 139

Esmond E. Snell and W. Terry Jenkins. The mechanism of the transamination reaction. Twelve figures 161

Hans Neurath and Brian S. Hartley. The hydrolysis of peptide and ester bonds by proteolytic enzymes. Eleven figures 179

Brian S. Hartley. The chemical structure of chymotrypsin. One figure ... 203

Frederic M. Richards. Comments on the modification of enzymes, with special reference to ribonuclease 207

Christian B. Anfinsen. Some approaches to the study of active centers. Three figures 215

Max Brenner. The aminoacyl insertion reaction. Nine figures 221

J. A. Cohen, R. A. Oosterbaan, H. S. Jansz, and F. Berends. The active site of esterases. Eight figures 231

Daniel E. Koshland, Jr. Enzyme flexibility and enzyme action. Nine figures 245

Philip Handler. Summarizing remarks 259
